PROFESSIONAL SUMMARY

Engineering-first technical leader bridging deep architecture with business strategy across ERPs, Supply Chain, FinTech, and Life Sciences with global collaborations. Excels at identifying stakeholder pain points, driving cross-functional alignment, and safeguarding team morale. Proven track record of leveraging AI and cloud-native architectures to build scalable, high-performance systems for global product companies.

CORE COMPETENCIES

- **Leadership & Strategy:** Technical Project Management, Stakeholder Alignment, Empathic Leadership, Team Morale & Enablement, Cross-Functional Collaboration, Business Growth Strategy.
- **System & Architecture:** Supply Chain Pipelines, Distributed Systems, Microservices, API Design, Enterprise Integrations (SAP/ERP), Cloud Orchestration, AI Integration.

PROFESSIONAL EXPERIENCE

L7 INFORMATICS | Senior Full Stack Developer | 2024 – 2026

- **Global Collaboration:** Led sprint execution and requirement gathering in tight coordination with US counterparts using Jira and Confluence, accelerating feature delivery timelines.
- **Team Enablement & Morale:** Unlocked Indian engineering team velocity by actively communicating technical gaps and identifying QA bottlenecks, fostering a highly motivated, collaborative environment to deliver faster, optimized solutions.
- **System Optimization:** Contributed to the full-stack architecture of life-science micro-apps using Flask, Vue3, and AG-Grid, implementing precise caching strategies and preserving reactive state to boost API responsiveness by 30–50%.
- **Strategic AI Initiatives:** Spearheaded internal AI adoption, analyzing LLM behaviors to introduce advanced prompting methodologies that optimized both engineering workflows and stakeholder communication.

Technology Used: Python, Vue3, PostgreSQL, TypeScript, Celery, Redis, Jira, Bitbucket, Flask, Docker, AG-Grid, Vitest, Pytest, Figma, AI

ZERO DIMENSION TECH SOLUTIONS | Solutions Architect (Contract) | 2023 – 2024

- **Cloud Operations:** Streamlined cloud-based structural data pipelines and CMS integrations for mid-sized brands, maintaining 99% uptime utilizing AWS and GCP serverless architectures.

Technology Used: NodeJS, Python, ReactJS, MySQL, TypeScript, Serverless (Lambda), Queueing (SQS), Loopback4, Laravel, Git, Docker, Express, Winston, JWT, SNS, Redux, ESLint, Tsconfig, ClickUp, CloudWatch Events, AWS

ZONO TRADETECH | Senior Software Engineer | 2020 – 2023

- **Supply Chain Integration Pipelines:** Architected and deployed scalable, AWS Lambda-driven data ingestion models allowing seamless third-party ERP/SAP enterprise data syncs for complex supply chain management.
- **Automated Tracking & Data Integrity:** Implemented custom batch-queuing architecture and granular feedback mechanisms to track failed, pending, and completed batches, drastically reducing data debt and eliminating manual re-ingestion loops.

- **Core API Design:** Designed core system API contracts, notification services, and user-input integration loops back to corporate SAP frameworks for real-time supply chain orders and fulfillment tracking.
- **Performance Engineering:** Restructured microservices and batch querying engines, reducing system latency from 3000ms to 200ms while scaling system reliability by 40%.

Technology Used: NodeJS, MySQL, TypeScript, Serverless (Lambda), Queueing (SQS), Loopback4, TypeORM, Git,, Docker, NestJS, PubNub, Express, Winston, JWT, SNS, React, React Native, Redux, CloudWatch Events, JS, AWS

VALUEFY | Senior Software Development Engineer | 2019 – 2020

- **Enterprise Financial Delivery:** Collaborated directly on-site with HDFC bank executives and client-side teams to deliver a highly performant wealth management system for Financial Managers overseeing international portfolios across Arab nations.
- **Custom Product Engineering:** Solutioned and integrated custom loan-based investment tracking features outside the core 'Wealthify' product scope, aligning tight technical delivery with complex financial requirements.
- **Performance Tuning:** Optimized existing enterprise APIs (Node.js/SQL), lowering average response times from 500ms to 100ms.

Technology Used: NodeJS, MySQL, Loopback3, Git, Jenkins, Redis, Oracle, MS SQL, PostgreSQL, Angular6, Elasticsearch, Docker, CLI

3IOLOGY | Senior Full Stack Developer | 2018 – 2019

- **End-to-End Product Leadership:** Spearheaded the development of a large-scale international trade data platform, acting as the sole technical lead, developer, and direct client liaison to gather requirements, establish sandboxes, and drive delivery.
- **Operational Scale:** Built custom, scalable CMS and ERP systems from scratch using Laravel, successfully managing the entire software lifecycle from architecture to client-side implementation to increase operational efficiency by 35%.

Technology Used: NodeJS, Express, MongoDB, Git, Angular6, CSS, HTML, JS, PHP, MySQL, Laravel, Bitbucket, Bootstrap, AWS

EARLY LEADERSHIP & TECHNICAL EXPERIENCE

- **Senior Developer & Project Manager | Skarma (2016 – 2018):** Directed technical operations and end-to-end development lifecycles for cross-platform AI chatbot architectures and custom CMS solutions.
- **Co-founder & CTO | Techfarm Global (2014 – 2016):** Directed end-to-end software development operations, aligning technical execution with strategic business goals while building and mentoring a team of emerging BE and MCA engineering talent.

EDUCATION

- **MBA in Blockchain Management | Minor: Corporate Communications & Digital Marketing – Dr DY Patil Institute of Management & Research (2025)**
- **Bachelor of Engineering (B.E.) in Computer Science – Ballarpur Institute of Technology (2013)**

SKILLS & ABILITIES

- **Full-Stack Development:** NodeJS, Python, MySQL, Express, React, ES6, Ionic, NPM, LAMP, Laravel, Jenkins, Angular, JSON, RDBMS
- **AWS and Cloud Services:** Lambda, SQS, SNS, ECS, RDS, S3, CloudWatch, Elasticsearch, Redis, DevOps, CLI, EventBridge, API Gateway
- **NLP and AI:** Embeddings, NotebookLP, Generative AI, Deep Learning, LLMs, Ollama, Vector DB, Semantic Search
