

Abhay Verma | Full Stack Developer | AI & Blockchain Enthusiast

Bangalore, India | +91 9673 305 368 | social.abhay@gmail.com | <https://github.com/abhayverma>

Summary

Full Stack Developer with 7+ years of experience in Python, Node.js, and AWS, building scalable platforms across life sciences, fintech, and SaaS. Skilled in microservices, cloud-native design, and API optimization, with strong exposure to Generative AI and blockchain (MBA in Blockchain Management). Blend of technical depth and business strategy to deliver reliable, innovative, and high-performance solutions.

Experience

L7 Informatics | Full Stack Developer

2024 – Present

- Developed and maintained full-stack features for enterprise life sciences software using Flask, Vue3, and PostgreSQL in a Scrum environment.
- Optimized API payloads by 30-50% and implemented critical bug fixes, enhancing overall system performance and reliability.
- Contributed to core platform modules including cli integration, data pipelines, scheduling, and licensing.

Technology Used: Python, Vue 3, PostgreSQL, TypeScript, Celery, Redis, Jira, Bitbucket, Flask, Docker, AG-Grid, Vitest, Pytest, Figma, AI

Zero Dimension Tech Solutions | Solutions Architect (Contract)

2023 – 2024

- Contributed to the development of Laravel and React applications, focusing on user experience.
- Assisted in maintaining CI/CD pipelines for deployment processes.
- Developed Python scripts for data processing tasks.

Technology Used: NodeJS, Python, ReactJS, MySQL, TypeScript, Serverless (Lambda), Queueing (SQS), Loopback4, Laravel, Git, Docker, Express, Winston, Yup, Parser, JWT, SNS, Moment, EJS, Redux, JSX, ESLint, Tsconfig, CLI, ClickUp, CloudWatch Events, AWS

ZONO TradeTech | Senior Software Engineer

2020 – 2023

- Developed microservices & implemented batch queuing architecture, reducing response time from 3000ms to 200ms.
- Built scheduler engines and API contracts for digital payments & invoice tracking, increasing system reliability by 40%.

Technology Used: NodeJS, MySQL, TypeScript, Serverless (Lambda), Queueing (SQS), Loopback4, TypeORM, Git, Docker, NestJS, PubNub, Express, Winston, Yup, Parser, JWT, SNS, Moment, EJS, React, React Native, Redux, JSX, CLI, CloudWatch Events, JS, AWS

VALUEFY | Senior Software Developer Engineer

2019 – 2020

- Optimized existing APIs, reducing average response time from 500ms to 100ms.
- Led client meetings and created requirement documentation for stakeholders, ensuring project alignment.

Technology Used: NodeJS, MySQL, Loopback3, Git, Jenkins, Redis, Oracle, MS SQL, PostgreSQL, Angular6, AD, Elasticsearch, Docker, CLI

3IOLOGY | Senior Full Stack Developer

2018 – 2019

- Developed a mobile-first application for a data provider using MEAN stack, improving data access speed by 50%.
- Created custom ERP systems in Laravel with third-party integrations, enhancing operational efficiency by 35%.

Technology Used: NodeJS, Express, MongoDB, Git, Angular6, CSS, HTML, JS, PHP, MySQL, Laravel, Bitbucket, GraphQL, Bootstrap, AWS

Education

Dr DY Patil Institute of Management & Research, Master of Business Administration

2025

Major: Blockchain Management | Minor: Digital Marketing & Corporate Communications

Ballarpur Institute of Technology, Bachelor of Engineering | Major: Computer Science

2013

Skills & Abilities

Full-stack Development: NodeJS, Python, MySQL, Express, React, ES6, Ionic, NPM, LAMP, Laravel, Jenkins, Angular, JSON, RBMS

AWS and Cloud Services: Lambda, SQS, SNS, ECS, RDS, S3, CloudWatch, Elasticsearch, Redis, DevOps, CLI, EventBridge, API Gateway

Web3 & Blockchain Technologies: Smart Contracts, Solidity, Ethereum, dApps, Web3.js, Ethers.js, IPFS, Hardhat, DeFi, NFTs

NLP and AI: Embeddings, NotebookLP, Generative AI, Deep Learning, LLMs, Ollama, Vector DB, Semantic Search

Project Management and Agile Methodologies: Scrum, Jira, Slack, [Aha.io](#), MS Teams, VS Code, PyCharm, Figma, Confluence, Canva, Trello, Asana, Clickup, Zeplin
